### Local Items

Five more weeks to do your  
Christmas shopping.

Mr. R. H. Powel, who has been  
relieving manager of the Union  
Bank at this point, left on Satur-  
day for Calgary. Mr. E. G. Par-  
son, who has been manager of a  
branch of the bank at Fort Mc-  
Murray, Alta., has been appointed  
manager of the bank here and ar-  
rived last Friday to take over his  
new duties. He was accompanied  
by his wife.

Mrs. J. L. Carter received the  
sad intelligence last Friday of the  
serious illness of her mother Mrs.  
Taylor, of St. Thomas, Ont. Mrs.  
Carter left the following day to  
be at the bedside of her mother.

C. L. Bowman, of Crystal, who  
has been spending a holiday in  
Edmonton, returned last Saturday.

Before sending your money out  
of town to mail order houses,  
look over the stock and prices of  
the local merchants and see if  
you cannot do as well by buying  
at home.

Everyone is invited to the fowl  
supper and entertainment in the  
Church to-night (Thursday). A  
good programme.

Order your Christmas Greeting  
Cards early. We have a large  
assortment to choose from—The  
"Chinook Drug Store.

Mr. J. R. Black, who has been  
for a number of years in the  
Chinook district acting as collec-  
tor for the International Harvester  
Company, has secured a position  
with the Universal Motor Cars  
Ltd., of Winnipeg, and leaves this  
week to take up his new duties.  
Mr. Black is well and favorably  
known in this district and his  
presence will be missed. Mrs.  
Black will remain in Chinook un-  
til the spring.

Mrs. J. E. Jeffery, who has  
been spending a few weeks in Ed-  
monton, returned last Thursday.

H. Howton and N. F. Marcy  
have purchased Radio Sets last  
week from the local dealers,  
Messrs Cooley Bros.

W. A. Hurley was a visitor in  
Saskatoon this week.

A wrestling match will be held  
in the Chinook School to-morrow  
evening, Friday, November 21,  
between Hilliary Miller, of Cap-  
pon, and A. Adams, of Chinook,  
two men well trained for the event.  
After the bout a dance will be  
given, with the Chinook Orchestra  
in attendance.

A very delightful evening was  
spent on Tuesday at the home of  
Mrs. Deman, when she entertained  
the ladies card club. The honors  
of the evening were divided be-  
tween Mrs. Montgomery and Mrs.  
Tracy, substitute for Mrs. Black.  
The former winning a lovely pair  
of towels, and the latter the con-  
solation. The club will meet at  
the home of Mrs. Kerr next Tues-  
day evening.

L. Shabino returned last week  
from Saskatoon where he has been  
receiving medical treatment.

### Robert Gardiner, M.P. Speaks at Chinook

Robert Gardiner, M. P., addressed  
a meeting in the Schoolhouse on  
Monday evening, dealing in the main  
with problems confronting the farm-  
ing industry. He reviewed briefly the  
work of the House of Commons, and  
more especially with the part played  
by the farmer members.

Dealing in detail with conditions  
in which agriculture has been placed  
since the war, he outlined the steps  
by which the farmer members from  
Alberta had proposed to remedy the  
sad state of affairs, detailing the fruit-  
less attempts to secure amendments  
to the bankruptcy act; and the fight  
to have the government cease a sense-  
less immigration policy, and devote  
more effort to make conditions toler-  
able for those already here. "In spite  
of the expenditure of millions of dol-  
lars" he said, "to bring in immigrants  
40,000 more people had gone from  
Canada during eleven months than  
had been brought in."

Mr. Gardiner told, in a very inter-  
esting way, the story of the Crows'  
Nest Pass Agreement, and showed  
that the people of the west had de-  
rived no benefit from its inception  
until the year 1917, when labor costs  
and operation expenses increased and  
the maximum freight rates allowed  
by the Crows' Nest Pass Agreement  
having been reached shippers had  
benefited for a short time from its  
provisions. The C.P.R. had appealed  
for its suspension however and suc-  
ceeded in that appeal, and had on two  
occasions got extensions. When the  
Crows' Nest Pass agreement went  
back into operation, the C.P.R. re-  
adjusted their rates as a discrimina-  
tory basis, which is a contravention  
of the railway act, and an appeal was  
made to the board of railway Com-  
missioners on behalf of shippers to  
have the C.P.R. rescind the discrimi-  
natory rates. Instead of dealing with  
the appeal in that way, Mr. Gardiner  
said, the Board of Railway Commis-  
sioners had abrogated the Crows'  
Nest Pass agreement in so far as it  
related to 13 commodities. In this  
way they flouted an Act of Parliament  
"Parliament," he said, "is the supreme  
governing body of the dominion, and  
for a board which is only an arm of  
the government to annul an act of  
Parliament involved serious conse-  
quences." Mr. Gardiner claimed that  
the government had acted in a spine-  
less fashion when it had shirked re-  
sponsibility by turning the whole  
matter over to the Courts of Canada.

The member for Medicine Hat went  
into detail with regard to what he  
considered the two fundamental and  
vital problems confronting agricul-  
ture and industry to-day, namely:  
Control by the producer of his pro-  
ducts through co-operative marketing  
and the abolition of the present bank-  
ing system through the nationaliza-  
tion of the production and issue of  
currency and credit.

He also dealt with the question  
of the natural resources, and asked  
if the people of the Province had  
any ideas along the line of what  
would be done with these resour-  
ces should they be handed over to  
Provincial control. In that re-  
spect he outlined a few methods  
which were indeed novel, and pro-  
vide much food for thought and  
discussion.

Closing, Mr. Gardiner made an  
appeal for unity on the part of all  
farmers in the endeavor to attain  
to the ideals so long sought after  
by the U.F.A. No organization  
could rise higher than the intelli-  
gence of its rank and file. The  
U.F.A. had been a great educa-  
tional influence, he said, but the

### Taxation

Problems of taxation, Federal and Provincial, and to some extent municipal, are subjects of consideration at a conference in session at Ottawa as this article is written between the Finance Minister of Canada and the Treasurers of the several Provinces. Methods of taxation constitute a problem in which all men entrusted with the responsibility of Government and the administration of public affairs must be and are deeply interested. They are not backward in displaying that interest, nor can they be accused of delinquency in imposing taxation, whatever other charges of neglect may be laid at their doors.

If members of Government, who are responsible for the imposition and collection of taxation, are thus deeply interested, how much more vitally interested should the people as a whole be who have to pay the taxes. It is regrettable, however, that a large percentage of the taxpayers give little thought or study to the subject except to give voice to criticism and complaints when paying their tax bills. The men and women who pay the taxes should be more keenly interested in the whole subject of taxation than are members of Government whose duty it is to impose, collect and then administer these taxes.

Every citizen should make it his or her business to learn everything they possibly can about this subject. They should study the form of taxation imposed on them; the scope of it; how the taxes are collected, whether economically or otherwise; whether unnecessary duplication in imposition and collection exist; and, finally, to what extent each particular form of taxation places a handicap on business, industry and national development. In a word, each citizen should endeavor to find out whether our systems and methods of taxation are serving their avowed object, or are really operating so as to limit the ability of the people to pay taxes.

According to newspaper reports suggestions for simplifying the imposition and collection of certain taxes have been advanced by Provincial representatives at the Ottawa conference, but these do not seem to meet with much favor by the Federal authorities. Under the British North America Act, the Provinces are limited to the imposition of direct taxes, and prior to the war the Federal Government refrained, for example, from imposing a tax on incomes. But the stress of war finance forced the adoption of a Dominion Income Tax. In some Provinces there are now three taxes levied on incomes, Federal, Provincial and Municipal. In other Provinces there is either a Provincial or a Municipal Income Tax as well as the Dominion tax. It is contended, therefore, that if the Dominion is by force of necessity compelled to maintain its Income Tax, it should make itself responsible for the collection of the whole of the taxes on income and rebate a stated percentage to the Provinces, thus doing away with much duplication and expense in collection.

This seems a sensible and economical proposal and one which undoubtedly would appear as businesslike to a majority of the people. But Governments are notoriously reluctant to collect taxes for other Governments, and rather than do so the people are forced to put up with and pay for much otherwise unnecessary duplication. It is time the people made their voice heard in the matter. It is their money that is at stake.

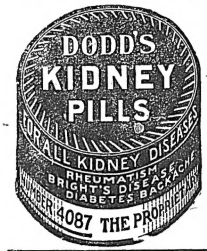

The Finance Minister at Ottawa should give heed to the representations of the Provinces, and careful consideration to the views set forth in the memorandum submitted by Provincial Treasurer Black, of Manitoba. Provincial policies and services do not impose additional expenditures on the Federal Government, but many Federal policies do compel larger expenditures by the Provinces without any compensating increase in Provincial revenues. For example, immigration expenditures by Ottawa mean additional population, and additional population results in increased Federal revenues through Customs, Excise, Post Office, etc., etc. But to the Provinces increased population means larger expenditures for roads, bridges, ferries, schools, administration of justice, etc., etc., with only a paltry return by reason of the per capita allowance from Ottawa.

The Dominion Government, too, has the whole field of taxation, direct and indirect, open to it. Its power to levy taxation is, therefore, elastic. But the power of the Provinces is limited. The Provincial requirements and expenditures are increasing without any corresponding increase in revenue. Not only is such a situation impossible for the Provinces and municipalities, but, as Mr. Black points out, it must in the long run adversely affect the whole Dominion because neither Dominion policies or finance can be maintained in a healthy state if the Provinces and municipalities are financially embarrassed. The whole subject of taxation in Canada requires careful study and wise overhauling, and in this work the interests of the taxpayer rather than of Governmental bodies elected to represent the taxpayer should receive first consideration.

### A Real Blow

Captain Found Young Officer Was Not So Stupid

It was the middle of the day's duty aboard ship, and the captain, who had had a pretty thick time of it the night before, was in consequence in no very gracious mood when the budding officer presented himself. "Good morning," he growled, "fool of the family sent to the navy as usual, I suppose." "No, sir," came the reply; "I believe things have altered a little since your day."

W. N. U. 1551

### Germany Excels In

Building Dirigibles

Can Obtain Better Results Than Any Other Country

In all probability the three-day crossing of the ZR-3 will stimulate the many schemes on foot for the development of dirigibles as commercial vehicles. That Germany obtains better results from these craft than any other country is unquestioned. To enforce the decree for razing the Zeppelin factory at this time would follow too closely a policy which has proved a dismal failure since the war. That is the effort at one and the same time to crush Germany beyond recovery, and to demand from her a reparations bill which she has no hopes of paying without resuscitation of her commercial power.

Some wives get comfort out of the thought that their husbands are just as good as other men when they are asleep.

Sunlight develops an antiseptic in our blood which kills germs very quickly. People who live in darkness do not possess this "antiseptic" blood.

Minard's Liniment Relieves Neuralgia

### Prevention Of Cancer

Free Use of Soap and Water Advised By Medical Man

The medical profession should interest itself in cancer prevention before it is too late. The disease, which is really is, in the opinion of Dr. James Ewing, professor of pathology at Cornell Medical School, who addressed the Ontario Academy of Medicine at Toronto. A few of the striking statements made by Dr. Ewing were: That a more violent use of soap and water would prevent much of the cancer of the skin.

Cancer of the stomach was seldom developed from ulcers of the stomach. Cancer of the mouth, tongue and lips was usually caused by the use of tobacco or by bad teeth. Cancer was usually caused by constant irritation over a considerable period of time. He expected to see a large increase in the number of cancer cases among automobile mechanics, due to their hands and arms being coated with oil.

### COLOR IT NEW WITH

"DIAMOND DYES"

These dyes and tinting is guaranteed with Diamond Dyes. Just dip in cold water to flat soft, delicate shades, or boil to dye rich, permanent shades. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

### Radio Signal Around the World

Eastbound Signal Wins Race By One Second

Two radio signals were flashed in the opposite directions around the world from the third annual National Exposition in Grand Central Palace, New York, and the eastbound signal won the race by one second.

The letter C, sent eastward, completed the circuit in five seconds, while the letter S made the westward journey in six seconds. The difference in time was due to the fact that the winning signal was relayed only three times while the westward signal was handled by one additional relay station. The relay points were: Eastward, Paris, Saigon, in French Indo China, and San Francisco; westward, San Francisco, Honolulu; Malabar in Java, and London.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home to-night. Try it.

### Predicts Cheap Aircraft

Will Be Sold For \$500 Says Airplane Manufacturer

H. G. Fokker, the airplane manufacturer, predicts that within 20 years aircraft will be selling for \$500. "Almost everyone will be flying then," he says, "because planes will be less expensive than motor cars. I am convinced that within ten years we shall be crossing the Atlantic within twenty-four hours, carrying passengers and mails."

Mr. Fokker says that 90 per cent. of the planes now being built in Europe were for the military and naval purposes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Expeller.

### Urges ZR-3 For Pole Trip

The ZR-3 can make the trip to the North Pole, explore the Arctic Circle and blaze an air trail across the top of the world, in the opinion of Captain Robert Bartlett, Arctic explorer.

### Transmit Power By Wireless

After 15 years of experiments, a Viennese carpenter named Schenkel has succeeded in transmitting high-power electric current by wireless.

One of the most valuable documents stored in Somerset House, England, is the will of Shakespeare.

MURINE For Your Eyes Refreshes Tired Eyes Write for Sample to Your Druggist

### Abandon Farm Lands

Alberta Dry Areas To Go Back To Cattle Ranches

The great triangle of land that lies between the Red Deer and Bow Rivers, extending east of Tilly as far as the junction of these rivers, about 3,500 square miles, being involved, will be the first drought area in Alberta turned back to big ranchers after the failure of farming experiments.

Federal and Provincial Governments will call a conference of those interested before Christmas, and this land will again be offered for ranching leases by early spring.

The plan for converting abandoned farm land into cattle range is not a matter of months, but many years. It is possible that it will be necessary to run sheep on much of the land that has been cultivated and is now a mass of weeds. Sheep will thrive on this feed and will gradually bring the land back to grass. Experts in the United States have estimated that it takes from twenty to fifty years to bring back cultivated land to virgin soil. When the government takes this action, it will be the first move on a large scale to readjust farming conditions in the drought area.

### No Loss To Canada

Country Can Get Along If Mexico Closes Consular Offices

Mexico has decided to close its consular offices in Canada. That it had any to close will be news to most Canadians. While no possible foreign market is to be viewed with indifference, Mexico will have to change its ways before it will be more profitable to do business there than to seek buyers elsewhere. As for the treatment of Mexicans in Canada, that will be no news without Mexican consuls there to help them. As for the treatment of Canadians in Mexico, that cannot well be worse than it has been and anyone who chooses to seek adventure in that part of the world is entitled to carry his own risk. If Mexico can stand the break in relations Canada will try to bear the separation with fortitude. —Edmonton Bulletin.

### General Gordon's Bible

Given to Queen Victoria and Kept at Windsor Castle

In the King's private library, at Windsor Castle, as well as in the King's Library at the British Museum, the Bibles are a very special feature. And if it were possible to imagine these treasures being put up to auction at one of the famous sales rooms, all the collectors in the world would gather in order to bid for them.

The most honored copy of the Scriptures is the ordinary limp-backed little Bible which thousands of people take to church or keep in readiness there. This Bible lies open, upon a beautiful cushion, enclosed in an exquisite old casket, in a window of Windsor Castle.

The open page is much soiled and thumbed, even passages are underlined, and there are numerous pencilled notes in the margin. This is General Gordon's Bible, given by his sister to Queen Victoria.

### Claims He Renews Youth

Paris Doctor Tells of New Method Called "Blood Graft"

Dr. Javarski, a biologist, told an interested audience of Paris physicians of alleged results obtained by application of a method of rejuvenation he terms "blood graft." This after a series of experiments with animals, he has now tried out on humans. Several of his "subjects" came forward to bear out Dr. Javarski's subjects.

### Britain Willing To Experiment

Many who proclaimed that Britain was going to the dogs when the Labor party took office are now pointing to the elections as proof of the country's sanity. They forget that the British people have had a long political experience and are not afraid to make experiments. If they are not satisfied with one experience they try another. The present election is not the end of the process by any means. —Toronto Globe.

### Ontario Becoming Settled

During the past year the Ontario Department of Agriculture, through its colonization branch, has located upwards of 4,000 settlers upon farms in the province, according to the annual report of the director of the branch. In addition quite a large number of settlers were located in Northern Ontario.

English farmers have started a co-operative bacon factory to eliminate some of the middleman's profits.

A powder made from fish, which will increase human weight, has been compounded by a Japanese scientist.

The ostrich feather industry in South Africa is on the decline.

### Alberta Boundary Established

Line Between Alberta and B.C. Now Fully Located

After 11 years work on the boundary line between British Columbia and Alberta, R. W. Cantley, engineer, has completed the undertaking. This year the surveying was done in the mountain country and passes near the Smoky River.

The border between the two provinces is now fully located and staked off from the international boundary to a point on the meridian north of the Peace River block. It is expected that it will not be continued further north until such time as development in the northern portion of the provinces necessitates further boundary surveys.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

### Wool From Trees

A substance that has many of the qualities of natural wool has been produced from the long, slender spines of the Scotch fir by German scientists. This wool can be curled, felted and spun or woven into carpets, and, mixed with a canvas warp, makes excellent blankets. The coarser qualities are used for stuffing mattresses and have been found proof against insects, while the aromatic odor is said to be agreeable and beneficial to patients.

It takes two to make a quarrel, but a dozen or more generally take a crack at it before it is patched up.

### New Departure In Dentistry

Dog In London Equipped With Set of False Teeth

Fitting Fido with new sets of teeth has become a practicable operation. It was inaugurated by Professor F. T. G. Hobday, honorary veterinary surgeon to King George, who eighteen months ago was appealed to on behalf of an aged Schipperke, which had lost all his teeth. Impressions were taken of his mouth and a set of false teeth fitted with springs and wires as in human dentistry. The animal finally was equipped with new ivory, the cutting edges reinforced with platinum foil and gold solder. He was then reintroduced to his daily routine chop. According to Dr. Hobday, the dog attacked the bone with as much vigor as when he had his original teeth.

### Record Submarine Voyage

British Submarine Carried Everything Required For Eight Months' Cruise

The longest voyage ever undertaken by an underwater craft, was recently completed by K-25, a vessel belonging to the British navy. The ship traversed 20,000 miles, and although the voyage lasted eight months, officers and crew lived aboard the submarine throughout the entire cruise without any assistance from a parent ship. Everything that was required was carried in the submarine itself. Even Charles Brun, who built the first mechanically-propelled submarine in France, in 1863, had probably no idea of the tremendous future which was to open out before the new invention.

The Old Testament contains 23,214 verses, while there are 7,559 verses in the New Testament.

## Science Scores New Triumph Which May Ultimately Have Far Reaching Possibilities

Taking another lesson from nature, science has scored a new triumph which may result in the manufacture of the world's food supply. If the human race should ever become so numerous as to cover all of the earth's land areas and leave no room for agriculture.

Addressing a meeting of American scientists at Columbia University, Prof. E. C. G. Baly, senior professor of chemistry in the University of Liverpool, told of his success in making sugar by a process similar to that employed by the green leaves of plants.

He told that he had duplicated nature by making formaldehyde from carbon dioxide and water, and from this formaldehyde, with the aid of ultra violet light, he produced sugar. For centuries men have watched living plants prepare sugar from the carbonic acid of the air and the water of the soil by the aid of sunlight. The wonder at this transformation was only increased when chemists showed that sugar consisted of nothing but ordinary black carbon and water. But in this case it was a long step between the analysis of sugar and its synthesis, and it is only now that their efforts are beginning to bear fruit.

Prof. Baly's discovery is said to rank with the great modern achievements of chemistry. It may be the beginning of developments which may result in the manufacture of the world's food supply, should the increase of the human race ever make agriculture impossible. At that time the world would subsist on the output of factories, instead of on the products of the fields. If it becomes possible to develop Prof. Baly's discovery to the fullest extent.

"So far as we are able to tell at this time," Prof. Baly said in his address, "we seem to be on the edge of finding out how sunlight changes inorganic matter into food elements in plants. We have not wrested the whole of this great secret from nature, and perhaps we never will, but our experience seems to indicate that we have approached it."

### For Drying Grain

Invention May Help Farmers in England in Damp Weather

An invention is being tried by the Institute of Agricultural Engineers at Oxford University, which, if developed, will remove one of the chief causes for grumbling on the part of British farmers and revolutionize English harvesting methods.

The invention is a new process for drying farm crops, a very necessary thing in the damp English climate. The plan is to cut the crop and make it into circular stacks of from 18 to 20 tons weight around a hollow central chamber. Heated air will then be blown over it by powerful fans. Haystacks have been dried by this means in ten hours without fermentation.

### Increase in Agriculture

Average Under Cultivation in 1924 Exceeds Previous Year

It is estimated by the Dominion Bureau of Statistics that more than 56,000,000 acres were devoted to field crops in Canada in 1924, as compared with 55,310,000 acres in 1923. Wheat occupied 22,064,568 acres, a decrease of 107,500 acres from last year. There were 14,400,000 acres of oats now, a slight increase over last year.

The number of horses in Canada increased in 1924 by over 100,000, there being 3,545,233 horses classed as farm livestock. The cattle population of Canada (exclusive of British Columbia) is 9,198,711.

### Ed. Howe On Advertising

Advertising is the most interesting reading in the newspapers. You advertising men have a lot to say about appealing to women—then they are the buyers. They do the buying—too much sometimes. If you know how much trouble you cause to men people with that appeal to the women you would go easier. E. W. Howe's Monthly.

### Could Use Their Inventions

If there should come another war, the common people should demand that it be fought out by the gentlemen who are inventing all the deadly war engines we read about.—Columbia Record.

### High Wheat Yields

The Lacombe experimental station reports a yield of forty bushels per acre on a thirty-five-acre field of barley. The highest yield in oats was seventy-two bushels per acre.

A small boy describes a snake as an animal that's all tall except his head.

W. N. U. 1561

### Successful Woman Farmer

Makes Success of Farming a Section of Land in Saskatchewan

Miss Jessie Nixon, formerly of Minneapolis, Minnesota, U.S.A., is making a success of farming a section of land south of Morthick, Saskatchewan. Previous to coming to the district, Miss Nixon was engaged in the commercial world, having an interest in the moving picture business, which she managed with success. Feeling the lure of the land she took up the homestead, without any previous experience, and at the end of the third summer finds herself established. Miss Nixon is interested in stock, and has a fine herd of cattle and has the satisfaction of being the highest market price for her butter. She also has a small flock of pure-bred sheep. Her hobby, however, is pigs, and she showed with pardonable pride a splendid herd of pure-bred swine, which she is raising along the lines of information given in the bulletins issued under the agricultural department of the University of Saskatchewan. In addition to this, Miss Nixon has turkeys and fowl which demand a share of her attention.

### Hogs and Sheep Up

Better Prices Obtained At All Principal Markets

At all the principal markets in Canada the Markets Intelligence Division of the Dominion Livestock Branch was able to report an increase on the average of the top prices for hogs and sheep on October 23 compared with the same date last year. At Toronto for hogs there was an average increase, taking all kinds into account, of \$2.22; at Montreal an increase of \$2.22; at Winnipeg an increase of \$2.22; at Calgary an increase of \$1.61; and at Edmonton an increase of \$4.00.

Of lambs and sheep the average increase, taking all sorts into account, was: At Toronto, \$1.25; at Montreal, 44 cents; at Winnipeg, \$1; at Calgary, 44 cents; and at Edmonton, \$1.25.

### To Settle Dispute

A Unique Scientific Duel Is to Be Staged in Berlin

An unique scientific duel between Sven Anders Hedlin, of Sweden, well known through his discoveries in Tibet and Trans-Himalaya, and Ferdinand Ossendowski, explorer and author of books on Asia, will be staged in Berlin in the near future.

Dr. Hedlin publicly denounced statements in Ossendowski's books as deliberate falsehoods and fabrications, and challenged him to a public debate. The author, who is now in Egypt, accepted the challenge, and agreed with his opponent upon Berlin as their meeting place. The date has not yet been set.

### Boost Sheep Industry

Alberta Range Men to Import 400 Rambouillet Breed Rams

There should shortly be an increase in the sheep population of Canada, at least in one section of the country, as Alberta range men have arranged for a shipment of 400 Rambouillet breeding ram from the United States. This enterprise is important as the sheep population of the entire world has declined, pre-war production of wool being 3,150,000,000 pounds, which dropped in 1921 to 2,600,000,000 pounds.

### Important Steel Discovery

Swedish Engineer Has Idea For Eliminating Smelting Furnace

Discovery of a method for extracting pure steel and forge iron directly from iron ore, eliminating the use of smelting furnaces, is announced by the Swedish Engineer Flodin, of the Hångfors Works. The invention, which is the result of extensive experimental work, has aroused lively interest amongst metal experts and will immediately be submitted to practical tests on a larger scale.

### Winter Feed For Buffalo

In meeting the need for winter feed for the buffalo and other animals in the park at Watkinsburg, Alberta, the Canadian National Parks Branch of the Department of the Interior is experimenting with the growing of sunflowers. Good results have been obtained so far and it is likely that the tests will be extended.

### Destructive Insects

It has been estimated that the annual loss in Canada to field, orchard and garden crops, due to destructive insects, is more than \$200,000,000. The consumption of insects by birds prevents this loss from being greater, and this forms one of the strong arguments for the protection of insectivorous birds.

### The Success Of Patient Effort

Value of a Citizen Who Would Establish a Permanent Home in the Country

Boosting and optimism are excellent things; they quicken development. But they are usually accompanied by a desire to "cash in" next field and to move on to the next field which promises easy money. It is better in the long run to appeal to a genuine sporting instinct, rather than to the gambling instinct. The Saskatchewan Government has wisely adopted this policy; as Premier Dunning told a Saskatoon audience a few days ago, it appeals not to the man who wants to get rich quick, but to the man who wishes by sane and patient endeavor to establish a permanent home for himself. The man who comes into a new country with such an attitude is likely to become an asset; the other type of "citizen" is much more likely to become a liability—and he is really more of a liability when he "succeeds" than he is when he fails.—Saskatoon Star.

### Publicity For Saskatchewan

Special Issue of the London Empire Mail Devoted to Province

A section of 11 pages of the special Canadian issue of the Empire Mail, published in London, England, is devoted to Saskatchewan.

It is profusely illustrated with photographs, including pictures of the first government buildings on Dewdney Street, the present parliament buildings, a herd of Herefords on the Matador ranch north of Swift Current, Saskatchewan's exhibit at the Royal Agricultural Show in Leicester.

Among the articles are one by Lieutenant-Governor Newlands on "The Empire's Grains," Premier Dunning on "Saskatchewan's Phenomenal Advance," Hon. C. M. Hamilton on "Agricultural Enterprise," Hon. S. J. Laflin on "Education in Saskatchewan," Hon. J. M. Urlich on "The Healthiest Province in the World," Hon. J. G. Gardiner on "Highways in Saskatchewan."

### Losses Were Heavy

Large Proportion in World War Fell To Newfoundland

In looking through some statistics of the Great War I was surprised to find that out of a total of 5,046 troops raised by the little colony of Newfoundland, 1,203 were killed and 2,314 wounded, making 3,517 casualties in all. No other community on either side can have had a larger percentage of losses. Like the Ulstermen, the Newfoundlanders suffered terribly at the Somme.—London Sunday Pictorial.

### Expense of the Canal Trip

Sending a big ship through the Panama Canal is a costly operation, though the doubt if it is cheaper than making the voyage around the Horn. The British warship Hood went to the canal recently and paid \$22,399.50 in tolls. The Hood is the largest vessel that has so far used the canal.—Outlook.

### A Good Show

She: "Are they putting that poor man out for laughing?" He: "No. The manager sent for him to find out what he was laughing at."

### COUPLE PLAN LIFE SERVICE IN TIBET

Missionaries Will Make Long Trek To Lonely Mountain Post On Chinese Border

If you were a young woman twenty-five and had a well-paying position as a school teacher in Chicago, would you marry a prospective missionary and plan to accompany him on a trip which will entail an eight hundred-mile ride on horseback and end at a point on the China-Tibet border where the nearest supply of kerosene is two weeks journey distant?

Or, on the other hand, if you were a young man of twenty-eight, born and raised in Chicago, and had a lucrative job with the Armour Grain Co., would you leave it, put up \$23,000 of your own money for supplies and transportation costs, and set off to spend the rest of your life as a missionary in a mountainous country as cold, as desolate, as primitive as that which Kipling described in "The Man Who Would Be King?"

Mr. and Mrs. Gordon Holland, of Chicago, have answered these questions in the affirmative. They sailed from Vancouver, B.C., October 23, on the Empress of Russia, for Shanghai. From Shanghai they will go to Hankow by river steamer, their ultimate destination being Titao, in the Kansu province. Part of the journey from Hankow can be made by rail, but 300 miles of it must be made on ponies. They must also transport about 2,000 pounds of supplies on pack ponies—heavy clothing, medicines, utensils and so on. They expect to arrive in Titao about Christmas.

After they have passed the period of probation they will receive \$400 a year from the Christian and Missionary Institute in New York for special instruction in the Chinese and Tibetan languages, and other courses considered necessary for their course at Columbia University.

### Farm Garden Essays

Bank of Commerce Competition Had Many Entries

The number of essays received from boys and girls reached the large total of 292. They came from all parts of the prairie provinces, the Saskatchewan contribution being easily the largest.

In the final placing, the Judges were assisted by Mr. F. W. Brodick, professor of horticulture at the Manitoba Agricultural College. As the number of essays received so largely exceeded anticipations, it was decided to award three special prizes of \$1 each, in order to give younger contestants a fair chance.

The results are as follows: First prize, \$4—Olive Curdie (age 14), Vonda, Saskatchewan. Second prize, \$2—Elmer R. Peterson (age 12), Conroy, Alberta. Third prize, \$2—Annie Fach (age 13), Newton, Manitoba. Fourth prize, \$1—Myrtle D. Deluns (age 15), Abernethy, Saskatchewan.

Special prizes of \$1 to contestants of 10 years old and under:

Andrey Armstrong (age 10), Osh, Alberta; Frank F. Horvick (age 10), Buchanan, Saskatchewan; Tony Welker (age 8), Tramping Lake, Saskatchewan.

Elstow Agricultural Society's prizes (22 essays were received):

First prize, \$2.50—Lillian Sanderson (age 13), Elstow, Saskatchewan. Second prize, \$1.50—Reggie Preston (age 10), Elstow, Saskatchewan. Third prize, \$1.00—Julia Smith (age 12), Elstow, Saskatchewan.

### Illiteracy Declining

More Illiteracy in Rural Than in Urban Districts in Canada

Illiteracy is steadily declining throughout the Dominion, according to information compiled by the Dominion Bureau of Statistics. This improvement in the educational status of the population five years of age and over, during the last 20 years, is indicated by the decrease in the percentage of illiterates from decade to decade. In the last census, for the total population five years of age and over, 9.55 per cent. were reported as being unable to "read and write," as compared with 10.50 per cent. in 1911 and 11.35 per cent. in 1901.

The effect of residence in rural and urban localities on the educational standing of the population is indicated by the fact that 6.48 per cent. of Canada's rural population, ten years of age and over, are illiterate, as compared with 2.66 per cent. in urban centres.

### Says Autos Promote Health

The automobile was praised as one of the most potent factors in promoting the health and longevity by Dr. Wooder Hutchison, M.D., and lecturer of Boston, in an address at Syracuse, N.Y.

"You can take you out in the open," he said, "into the air and the sunlight, nature's great curative forces. Your car adds to your years of life."

The highest rides in the world are those of the Bay of Fundy, where they frequently rise a hundred feet.

A soft answer may turn away wrath, but it doesn't turn away a peddler.

### Claim North Arctic Islands

Soviets Repeat Warning Note To All Foreign Governments

Foreign Minister Tchitcherine has addressed a note to all of the foreign governments regarding the rights of Russia over the Arctic islands north of Siberia, which he asserts, have recently been violated by the various powers of the north.

The reported action of the Soviet foreign minister, while not mentioning Wrangel Island, it is believed, may have been prompted by the discovery of a party of colonists on that island when the Soviet transport Red October went there recently, to raise the Soviet flag.

### Antelope Thrive In Captivity

The reports of the state of the antelope herd in the antelope reserve maintained by the Canadian National Parks Branch at Neakusik, Alberta, continue most satisfactory. There are now 180 of these animals in this reserve, their numbers having increased by fifty in the past year. The experiment has demonstrated that antelope can be successfully bred in semi-captivity.

### Soundings For New Elevator

W. N. Chater, an engineer for C. D. Howe and Company, Port Arthur, has arrived at Prince Rupert, B.C., to take soundings in connection with the plans for the new government elevator to be built there. Mr. Chater is now busy going over the site with the Canadian National Railways engineers.

Another way to practice thrift is to tell the wife that last winter's coat under her lock too young.

## Summary Of Business Conditions Would Indicate That Things Are Going Ahead In Canada

### Cause Of Unusual Weather

Huge Ring Around the Sun May Have Effect on Climate

Unusual weather conditions in all parts of the world during the last few months, especially marked by a late spring and early autumn, have given rise to the question whether climate is affected by a vast 100-million-mile ring of matter observed around the sun.

This faint, cone-shaped belt of light stretching up from the western horizon has been visible in clear skies before sunrise during the spring, and after sunset during autumn, according to Siriven Bolton, F.R.A.S., in the December number of Popular Science Monthly. It is known to astronomers as the Zodiacal Light. They explain it by saying that the sun is circled by a huge flat ring of matter somewhat like the rings of Saturn, and extending into space for more than 100 million miles, far beyond the earth and its orbit. Its position as seen from the earth is always edge-on; hence its cone-shaped appearance. The great ring is composed of huge conglomeration of minute solid particles, or meteoric bodies, having rough surfaces, and shining by reflected sunlight. Like the earth, each particle moves in its own elliptical orbit around the sun.

### Canada Needs British Settlers

Alien Races Should Not Be Allowed To Overrun Country

If the British race has lost the faculty of not knowing when it is liked, has outgrown the ability to colonize, has no longer the heart of the pioneer, then we may as well let the northern half of this continent go to the other races, even though they be yellow-skinned, who are still inspired by the urge to conquer new worlds. If, however, these attributes are still latent in the average Briton, then let those who possess them come in their thousands, regardless of fortune or vocation in life. We who are descended from the Elizabethan heroes ought to shrink from allowing men of alien races share the way to the conquest of the Empire which already we call our own.—Port William Times-Journal.

### Going Into Radio Business

Underwear Manufacturers Using Same Material to Make Loud Speakers

Underwear manufacturers are going into the radio business. They're manufacturing loud speakers. With the same material they have been using to make winter underwear.

According to one manufacturer whose mill, one of several in the same game, has been turned over almost completely to this new business, orders are in his books for 1,500,000 horns. These alone could keep his plant busy up to July of next year. Advantages claimed for this form of loud speaker are its smallness of tone, elimination of vibration and relative flexibility.

### Claim North Arctic Islands

Soviets Repeat Warning Note To All Foreign Governments

Foreign Minister Tchitcherine has addressed a note to all of the foreign governments regarding the rights of Russia over the Arctic islands north of Siberia, which he asserts, have recently been violated by the various powers of the north.

The reported action of the Soviet foreign minister, while not mentioning Wrangel Island, it is believed, may have been prompted by the discovery of a party of colonists on that island when the Soviet transport Red October went there recently, to raise the Soviet flag.

### Antelope Thrive In Captivity

The reports of the state of the antelope herd in the antelope reserve maintained by the Canadian National Parks Branch at Neakusik, Alberta, continue most satisfactory. There are now 180 of these animals in this reserve, their numbers having increased by fifty in the past year. The experiment has demonstrated that antelope can be successfully bred in semi-captivity.

### Soundings For New Elevator

W. N. Chater, an engineer for C. D. Howe and Company, Port Arthur, has arrived at Prince Rupert, B.C., to take soundings in connection with the plans for the new government elevator to be built there. Mr. Chater is now busy going over the site with the Canadian National Railways engineers.

Another way to practice thrift is to tell the wife that last winter's coat under her lock too young.

In a recent editorial the Ottawa Citizen summarized conditions in Canada in the following: "Things are going ahead in Canada. In one week the following interesting items, among others, have appeared in the press and publications of the Dominions:

"Although there was a decrease of \$1,586,402 in the export of pulpwood from Canada for the first nine months of the year, exports of paper increased by \$5,000,000. The total export business during the period named was \$102,050,333.

"The value of building permits in 66 cities shows a big increase for September. The value of buildings authorized reached \$14,566,504, as compared with \$10,475,618 in September, 1923.

"The British imports of flour in 1923, Canada accounted for 21 per cent, and the United States 25.50 per cent. Canadian millers are now exporting more flour than American millers, who controlled the market a few years ago.

"Canada has become Italy's rival as a meat and poultry manufacturer. Three years ago Canada imported 7,600,000 pounds of mutton, chiefly from Italy. Last year it imported only a few hundred pounds. Canada's factories turned out 12,000,000 pounds. Exports increased from 215,000 pounds in 1922 to 2,239,000 in 1923. The product went chiefly to Britain, United States and Belgium.

"During the last year the Ontario Department of Agriculture has located 4,000 settlers on the land.

"Manitoba's output of butter will be a million and a half pounds greater than last year. Manitoba's home crop for 1923 is officially 3,041,712 pounds, an increase of more than 3,000,000 pounds over 1922. Western Canada's wool clip this year will total 12,000,000 pounds, valued at \$4,600,000. Saskatchewan will show a 60 per cent increase in dairy products this year.

"British Columbia has shipped one thousand rose bushes to Portland, Oregon, known as the Rose City of America. Lumber shipments from Vancouver for the first eight months of 1924 totalled 295,282,000 feet, compared with 176,921,312 in 1923, and 166,972,515 in 1922.

"Apparently Canada is getting into her stride again. Such a revival as the one given Canada makes one feel confident of the future."

Financial men estimate that as a result of the higher price for wheat and other grains this year the farmers of Western Canada will have \$175,000,000 more to spend in 1924 than they did in 1923. Bankers report that some of them in New York Street announced this wealth have already met all their obligations and are now entirely out of debt and with good bank accounts to face another season.

### The Hutterites' Experience

An Effective Answer For the Spreaders of Gloom

When the Hutterites declare that in five years in Southern Alberta they have raised more wheat than in forty years in North Dakota, the most effective answer possible is provided to the spreaders of gloom. Probably Southern Alberta's chief trouble in the past has been that it had too many people living here with the idea in the back of their heads that a few years' farming in Southern Alberta would put them in Easy Street financially. No agricultural area in the whole world has ever made a man richer after one or two years' farming.—Lethbridge Herald.

### Not a Popular Delicacy

The applicant for cook was untidy and insolent in appearance.

"Don't hire her," whispered Jones to his wife; "I don't like her looks."

"But," remonstrated his wife, "just consider the reputation for cooking she bears."

"That doesn't matter," said Jones testily; "we don't want any one who looks like that."

### Patent Pused

A copy of a patent issued in 1791—the fourth patent ever issued in the United States—has been found by the patent office of the department of the interior. The patent was signed by George Washington. It was granted on a new type of machine for making printing type.

### Canadian Tobacco

Tobacco is grown in Ontario in the counties along the shore of Lake Erie; in Quebec, in the counties near Montreal, along the St. Lawrence; and in the Okanagan Valley, British Columbia.

A luck and key with a loose arrangement of teeth, so the adjustment can be changed has been patented in Germany.

## DATE IS FIXED FOR APPEAL ON FREIGHT RATES

Ottawa.—The government will hear argument on Thursday, December 4, in the case of the appeal of the governments of the western provinces from the decision of the Board of Railway Commissioners in respect to the Crow's Nest Pass freight rates. Premier King announced at the conclusion of a cabinet meeting. The Crow's Nest Pass decision and the appeals were the first matters to be taken up at the Cabinet Council, when 16 members of the cabinet were present. There has been no action taken on the appeal that the judgment of the Railway Commission should be set aside until after whatever hearing granted.

December 4, it was stated, appeared to be the earliest date that the hearing could be arranged and, in view of the fact that the western provinces must obtain the consent of the Railway Commission before carrying their case to the Supreme Court of Canada, it was hoped that the commission would make it possible to grant a hearing at the same time, although Thursday, November 27, had been fixed as the date for the commission's hearing.

## Ontario Entry Wins At Guelph Show

Manitoba Steer Came Second After Hard Contest

Guelph, Ont.—The last day of the winter fair was given over to the judging of market cattle, of which there was an exceptionally large class, 62 being in the arena at one time, making selection of a winner a most difficult task. The grand champion steer was the entry of John Kopas, of Elora, Ont., who won the coveted ribbon with "Matchless Duke" after a hard contest with the Manitoba champion Aberdeen Angus, owned by the Manitoba Agricultural College.

## Earthquake In Java

Many Deaths As Result Of Terrible Catastrophe

Batavia, Java.—The island of Java has been severely shaken by earthquake. Already 500 persons are reported killed and countless numbers are missing. The earth shocks extended over two days. Many native towns in the Kedu district, a central residency of Java, have been destroyed by landslides. One village completely disappeared into the river.

## Wembley Staff Leaves

London.—The Canadians who did police duty at the British Empire Exhibition at Wembley sailed for Canada on Nov. 14. A large number of railway officials who were on duty at Wembley also sailed on the Montrose as well as many New Zealand and Australian representatives who are returning home from the big exhibition by way of Canada.

## Want Canned Heat Banned

Toronto.—Urging that the government announce legislation to prohibit the sale in Ontario of canned heat, such as methylated spirits, also of extracts, a deputation of women composed of members of the United Women's Educational Federation waited on Attorney-General Nickle and pointed out that the extracts were being taken as intoxicants.

## No Advance In Lake Freight Rates

Fort William, Ont.—The records of the grain commission at present show no advance in lake freight rates, other than that charters for the end of the season have been made at an advance of about half a cent, a condition which always recurs at the end of every season.

## Commemorate First Flight

Paris.—A memorial stone commemorating the first officially controlled airplane flight in France was inaugurated at Bagatelle, in the Bois de Boulogne, where M. Santos-Dumont covered 220 meters in 21 1/5 seconds on November 12, 1906.

## Reaches Kingston

Kingston.—Peter Smith, former provincial treasurer for Ontario, entered Portsmouth penitentiary, Nov. 12, to serve three years for conspiring to defraud the province in the sale of bonds.

## Swedish Poet Wins Nobel Prize

Stockholm.—The Swedish Academy awarded the 1921 Nobel prize in literature to the Polish author, Vladislav Reymont. The recipient is one of the later school of Polish poets.

W. N. U. 1551

## Reparations Commission May Cease To Exist

Paris.—Permanent eclipse of the Reparations Commission to a partial, if not to a total extent, is foreshadowed in a communique issued by the commission's general secretary. The communique describes the measures of reorganization which will be enforced by January 31 "in consequence of the creation of organizations provided for in the experts' plan, the functioning of which must entail considerable reduction in the work of the organizations of the Reparations Commission."

## King Fued Confident Of Ruling Sudan

Believes British Will Eventually Grant Extension Of Sovereignty

Cairo, Egypt.—King Fued in the address from the throne on the occasion of the opening of the Egyptian Parliament, declared that while the recent visit of Premier Said Zagloul Pasha to Great Britain did not result in the beginning of new negotiations, the Egyptian Government had full confidence that this eventually would be the result.

"We shall reach our goal," he said, "by virtue of the strength of right, of the union of the people, of their attachment to the throne, and of the solidarity of all for the safeguarding of our rights in the two parts of the valley of the Nile, without admitting or recognizing any act likely to prejudice them."

## Question Of Natural Resources

Disposition Now Is To Deal With Provinces Separately

Ottawa.—Premier Greenfield, of Alberta, is coming here this month to have another conference on the question of returning to the province its natural resources in public lands and minerals, but no similar move in the long standing matter has been indicated by Manitoba or Saskatchewan. There is no foundation for the eastern report that a new inter-provincial conference of all the provinces will be summoned on the question. Several held in the past 10 years were abortive. Moreover, the disposition is to regard the question as essentially western, with the later plan is to deal with the provinces concerned individually instead of collectively, owing to the dissimilarity of their interests.

## Border Patrol Strengthened

U.S. Takes Precautions To Stop Illegal Entry From Canada

Washington.—The United States immigration border patrol for the Canadian boundary is being recruited to its full strength of 450 men. The end of Canadian harvest, immigration from America has found an increasing number of persons attempting to come into this country illegally and every precaution is being taken against this drive.

A dispatch from Winnipeg said the United States border patrol was to be strengthened to combat the smuggling of aliens into North Dakota and Minnesota from Manitoba and Ontario.

## Reviving Interest In Wembley

British Government Will Open Exhibition Again Next Year

Stanley Baldwin's declaration that the government is determined to open the great Wembley exhibition again next year has had an immediate reviving interest in the fair and its future.

Major Tomlin stated that he is still waiting for official word from Ottawa, but that he has already started his plans to make the second exhibition far more representative of Canada than was last year's. He says that he expects Canada's participation next year will be greater than this year.

## France Will Pay War Debt

London.—The French ambassador has informed the Canadian High Commissioner, Hon. P. C. Larkin, that on December 31 the Government of France will pay off the debt it owes Canada in connection with the war, the amount totalling \$5,657,000.

## Fatal Explosion at Grand Rapids

Grand Rapids, Mich.—Two men were killed, one is dying, and 12 are injured as the result of a terrific explosion which destroyed the loading dock and receiving room at the main Grand Rapids Post Office, with a property damage of \$50,000.

## German Jewelers Busy

Pforzheim, Germany.—One of the few German industries running on full time at present is the jewelry business here which for some weeks has been operating at capacity to catch up with Christmas orders.

## Denounces Bolshevism

Emma Goldman Excoriates Russia's Soviet Government

London.—Emma Goldman, who was deported from the United States in 1919 as an undesirable alien, and now seeks asylum in England, was welcomed by three hundred Britons to their country at a dinner given in her honor here. Miss Goldman spent a considerable part of her exile in Russia, and she eloquently excoriated Russia's Soviet Government.

The oppressed masses in Russia, she said, were being silenced as they never were under the Czar, and all ideas had been discredited by the ruling forces in that country. Bolshevism, she characterized as an international disease, and she promised to fight hereafter, wherever she might be, for the principles of liberty, which were the most essential things in human life.

"To call the present Soviet Government a worker's experiment is the most preposterous lie ever told," Miss Goldman told her audience.

## CALL ANOTHER CONFERENCE ON TAX PROBLEM

Ottawa.—The calling of further conference to deal with the problems which arise from time to time in the administration of provincial affairs is urged in a resolution passed by the closing session of the conference here between Hon. J. A. Robb, acting minister of finance, and representatives of seven of the provincial governments.

A spokesman for the conference stated that it had been found that the problems arising out of the administration of public affairs in the various provinces presented so many varied aspects that the solution of such problems would be materially assisted by the further interchange of opinion.

The conference was unanimous in its recommendation for the exercise of economy in the administration or governmental departments.

The following agenda for the proposed conference was set forth in the resolution:

- (1)—Overlapping in departments where joint federal and provincial jurisdiction is being exercised.
- (2)—The consideration of income tax as to collection and allocation.
- (3)—Exemption of all purchases by and on behalf of provincial governments from operation of sales tax.
- (4)—Adjustment of federal subsidies to provinces with a view to having provincial subsidies bear a reasonable ratio to provincial expenditures.
- (5)—Provincial taxation of all nationally operated railroads.
- (6)—Inter-provincial relations in respect to succession duties.
- (7)—Consideration of measures for the reduction of taxation and further economies in administration.

## French Scheme To Lower Living Cost

Will Import Thousands of Live Sheep and Cattle

Paris.—To bring down the price of the family steak and chop the federation of French provision traders has submitted to Premier Herriot a scheme for the importation on the hoof of 70,000 sheep and 20,000 cattle from the Argentine, Uruguay, and Abyssinia. The federation spokesmen claimed that this imported meat would be at least 10 cents a pound under the price of the home-grown article, and succeeded in convincing the premier to the extent that the latter agreed to recommend that the minister of agriculture permit the plan to go into operation.

Charles Dickens' old home, Gadshill Place, is being transformed into a young ladies' boarding school.

## BRITISH YOUTHS TO STUDY FARMING

The first party of British youths brought to Alberta under the Empire settlement plan to study western farming conditions, reached Vermilion, over the Canadian National Railways recently. The boys are shown here on their arrival at the Canadian National station at Quebec en route to Western Canada.—C. N. R. Photos.

## Premier Of Britain

Stanley Baldwin, who will lead the newly-formed Conservative Government in the Mother Country.

## Awaits Return Of Chief Commissioner

Prairies' Application For Crow's Nest

Ottawa.—The application of the prairie provinces for leave to appeal to the Supreme Court from the judgment of the railway commission in the Crow's Nest rates case will likely be heard here on November 24, following the return of the chief commissioner from the west. There is no question of this leave being granted.

The matter has been before the cabinet, the request for a suspension of the commission's order having been deferred. While the matter is regarded here as primarily one of law it is possible that the appeal to the cabinet may be followed by requests for a hearing before that body on the ground that questions of fact, as well as of law, are involved in the commission's ruling and its interpretation of its powers.

## Large Wheat Decline

Crop Estimate Gives Total Yield As 271,622,000 Bushels

Ottawa.—A crop report issued by the bureau of statistics estimates the wheat crop at 271,622,000 bushels. This is 20,000,000 bushels less than the last estimate. The final estimate for last year was 474,199,000 bushels. For the three prairie provinces the provisional estimates of the yields of the five principal grain crops are, in bushels, as follows, the final estimate for last year being given within brackets:

Wheat—245,306,000 (452,260,000). Oats—233,435,000 (391,756,000). Barley—66,326,000 (59,775,300). Rye—11,738,000 (20,812,000). Flaxseed—9,641,000 (7,044,800).

## May Build Singapore Naval Base

Sydney, Australia.—Premier S. M. Bruce, in a recent speech said he was confident that the new British Government would proceed at an early date with the construction of the naval base at Singapore, and would give effect to decisions of the Imperial Economic Conference of last year.

## Uses Radio To Boost Loan

Paris.—Finance Minister Clementel is to open the selling campaign of the new French internal loan in comfortable and modern fashion, broadcasting from his office armchair a talk extolling and explaining the advantages of the new bonds to the investor and the government.

## To Pay Death Penalty

Tokio.—Daisuke Namba, charged with an attempt to assassinate Prince Regent Hirohito while the latter was driving from the Imperial Palace to the Diet on December 17, last year, was condemned to death. The trial took place in the Supreme Court, the public being excluded.

## To Investigate Relations Between Britain and Mexico

London.—One of the first acts of the new Conservative administration is expected to be re-opening of a complete investigation of the relations between Great Britain and Mexico. The attitude of the new cabinet, as a result of the successful overthrow of the De La Huerta revolution, and the desire for a resumption of relations by commercial organizations, is said in well-informed circles to be quite friendly. Foreign minister, Austen Chamberlain, is expected to appoint a committee to investigate the relation of the two countries.

## Australia Wants Voice

Should Be Consulted In Framing of Empire's Foreign Policy Says Bruce

Sydney, Australia.—Premier Bruce, in a speech at Dubbo, New South Wales, in which he dealt with Australia's present position in the British Empire, said if Great Britain or any other part of the Empire were attacked, Australia automatically would be at war. Therefore, if Australia were liable to be attacked because of her connection with the Empire, she must demand the right to be consulted in the framing of the Empire's foreign policy, he said.

## To Preserve Peace

British, French and Belgian Pact Urged For European Harmony

Brussels.—An Anglo-French-Belgian pact would be the surest security for maintenance of peace in Europe, Foreign Minister Hymans declared in reviewing foreign affairs at the opening of parliament.

He said that since the armistice Belgium had never ceased to work for such a pact. The foreign minister, however, praised the League of Nations protocol as a step toward ultimate disarmament and peace.

## U.S. INTERESTED IN UTTERANCE OF SIR AUCKLAND

Washington.—United States Government officials and members of congress expressed keen interest in the utterances of Sir Auckland Geddes, former British ambassador to the United States. Sir Auckland, speaking at Westminster Hall, London, held that the United States was exercising a profound influence on the United Kingdom, and to an even greater extent, on Canada and other Dominions, and that in Washington there "is an instinctive understanding of their difficulties."

Few leaders in the United States would have been prepared to portray the influence of the United States over the Dominions or the United Kingdom as so great as Sir Auckland put it. Nevertheless, it has been realized here for years that there has been a "gradually improving understanding with Canada and the British Empire in general. Sir Auckland's remarks are the most interesting as it has been well known here that he has discouraged the sending of a Canadian ambassador to Washington. Sir Auckland's reference to "Dominions that look on the Pacific," is regarded here as an allusion to the Japanese immigration question, on which this country, Western Canada, Australia, and New Zealand have, to a large extent, a common view.

## Defeat Of Victorian Labor Government

Adverse Vote On No-Confidence Motion Was Anticipated

Melbourne, Australia.—The Victorian Labor Government was defeated in the legislature by a vote of 34 to 28 on a motion of want of confidence. The no-confidence motion was moved by J. Allan, leader of the Farmers' party. The adverse vote against the government was anticipated.

## Sues Loeb and Leopold

Joliet, Ill.—Suit for \$100,000 damages was filed in Circuit Court here against Nathan F. Leopold, Jr., and Richard Loeb, serving life terms for slaying Robert Franks. The suit was filed on behalf of Charles Ream, a taxicab driver of Chicago, who charged that the two mutilated him.

## C.P.R. Buys Land For Settlers

Montreal.—A block of agricultural land sufficient to support about two hundred families, has been purchased by the C.P.R. in the vicinity of Nova Scotia, will be sold to incoming next spring, under easy financial arrangements.

## U. S. MAY SOON BE PURCHASING FARM PRODUCTS

Washington.—President Coolidge declared in an address before the annual meeting of the Association of Land Grant Colleges, that the government would omit no effort to prevent a repetition of recent misfortunes involving agriculture, but assured them that the farmer also must readjust his methods of production and marketing "until he comes within sight of the new day."

It was the first public address Mr. Coolidge has made since the election, and was devoted to a discussion of agriculture, which is the principal subject before the college representatives at their conference.

The immediate problem, the president said, is to bridge over the difficulties resulting from abnormal and war-stimulated surpluses, while, he added, preparation must be made also for the time fast approaching when "we are likely to be one of the greatest of the agricultural buying nations."

"The hope lies," he declared, "in organizations and methods which look to economies and efficiencies in producing and distributing."

Meanwhile, the president urged that the educators and farm leaders turn their attention to scientific marketing. The agriculture problem today, he insisted, is not on the side of production, but on the side of distribution.

Too little thought has been given to this phase, he added.

## Western Farmers Win Prizes

Prairie Exhibitors Carry Off Awards At Guelph Fair

Guelph, Ont.—Western Canada again figured prominently in the prize list at the Western Ontario Fair here, Saskatchewan and Manitoba exhibitors in the Clydesdales being particularly successful. The Shorthorn reigned supreme in the arena, when over 80 animals, picked from the finest herds in Ontario and the western provinces, competed for the awards. The purple ribbon for the best bull exhibited was carried off by Beauty Chief, owned by Amos Black, of Moffat, Ont., while the award for the champion female was captured by "Wright Farms, of Drinkwater, Saskatchewan, on Clipper Zoe 2nd.

In the bulls, senior calf, J. I. Miller, of Kane, Man., took sixth place. In the Clydesdales, Ben Pinlayson, of Brandon, took first in the aged stallions and first in the three-year-old stallions.

Dr. D. D. Reid, of Canora, Sask., was first in the stallion yearling and John Bryce, Arcola, Sask., was first in the foal stallion.

## Exploration Ship Has Ended Drift

Vessel Depending On Sails To Reach Safety In Baffin

Christiania.—The Norwegian explorer Otto Sverdrup said the latest message he had received from Røald Amundsen's exploration ship, the Maud, was "unfavorable." He expressed the fear that the plan to drift past the North Pole in the Arctic ice field would have to be given up. Dr. Fridtjof Nansen, the explorer, is said to interpret the message from the Maud to mean the vessel has abandoned the drift and is now trying to get back to Bering Strait. He believes the Maud has exhausted her oil supplies and must depend on her sails to reach safety.

## To Aid Landholders

Alberta Premier Goes East With Definite Colonization Policy

Edmonton.—Premier Greenfield took with him, when he left for the east, a definite government policy in regard to the colonization of the Lethbridge Northern Irrigation District and the adjustment of the present landowners' financial affairs. He will discuss the latter angle of the policy with representatives of the leading mortgage houses in Toronto at present invested in Southern Alberta investments.

## Robbed By Bogus Inspectors

Montreal.—Two bogus "radio inspectors" forced their way into the home of Mrs. Zee Mailotte and, after binding and gagging her, made off with her rings, which they pulled from her fingers, two gold watches from a bureau drawer and as much of the family silver as they could conceal in a sack.

## Spread of Bubonic Plague

Secundrabad, British India.—An epidemic of the bubonic plague, which has already caused 4,000 deaths, has broken out in the native quarter of Trimalgiri, near here. One of the victims was a British soldier.

## Will Build Giant Airships

Contract Placed by British Government for Ship That Will Cross Atlantic in Two Days

Contracts for construction of an airship to take the direct air route from London to New York in two days, have been placed by the British Government.

Vickers, Ltd., the company which makes all sorts of war materials and other things, will build the huge ship. Sir Trevor Dawson, vice-chairman of the company's directors, has announced.

"Commercial success depends on the development of adequate motors," Sir Trevor said.

"We hope to obtain engines that will permit people even to visit the United States for the weekend. When we complete the airship we expect to accomplish the westward journey in two days and to make even better time coming home."

The airship will be built at Howden, where the ZR-2 was built. The ZR-2 had been built at Howden and had been in flames during the last aerial flight, before she was to have sailed across the Atlantic for delivery to the United States.

Most of the masts and United States crew of the ZR-2 died in the wreckage of their craft.

Investigation later disclosed structural faults which caused the collapse.

She was built to remain on the ground, "one self-starter," and "not to fly."

## No Argument Allowed

Chicago Couple Must Talk On Alternate Days Says Judge

A Chicago couple went before a judge. He found that their arguments were constantly getting them into trouble, so he decreed that they should talk on alternate days, and there were to be no interruptions.

The wife is to do all the talking on Mondays, Wednesdays and Fridays and the husband all the talking on Tuesdays, Thursdays and Saturdays. Neither one is to argue on Sunday.

This schedule, if lived up to, should put an end to the peaceful domestic quarrels. Perhaps one day a judge will find a remedy for family troubles which reveal themselves in the refusal of either husband or wife to speak to each other, but it would seem to be a more difficult task.

Stanford Bacon-Hornell.

## Menonites Will Inspect Western Land

Temporarily Settled in East Are Planning Permanent Home

The Russian Menonites, who recently settled temporarily in Waterloo county, are already planning for their new permanent home. After having had several sites suggested to them in Western Canada by David Toews, of Rosetown, Sask., head of the western committee, they have decided to make a personal inspection of them.

One tract under consideration is that located recently by the Menonites who went to Mexico while the Canadian Pacific Railway has offered several sites, one being near Edmonton and another in Manitoba.

## Safety First Measures

Chicago to Train Children to Avoid Street Accidents

"How to cross a boulevard safely," will be part of the study of Chicago's twentieth century school, according to plans formulated by Mayor Devore's safety council, which is combating the city's mounting death rate from automobile accidents. It is proposed to institute a daily school study period devoted to "teaching the youngsters the value of 'safety first' in negotiating the perilous highways of the city."

Geeks Records of Ancient Race

Dr. Gann, archaeologist and expert on the Mayan civilization of Honduras and Yucatan, is on his way to Jamaica, whence he will go to British Honduras to explore the ruins of the ancient Mayan city which he and a number of companions discovered early this year. He then hopes to have inscribed on jade or painted pottery a date prior to 62 B.C., the earliest Mayan date at present known.

Full Irrigation

More attention was paid this year to full irrigation in Alberta than ever before, and farmers soaked their land in preparation for next year's crop. It has been repeatedly demonstrated that full irrigation practically means a crop the following season, the reservoir of moisture hiding the crop over the critical period of germination.

Gold probably was the first metal to be employed by men; it was used for ornaments before any other metal was discovered.

W. N. U. 1571

## Few Socialists In Britain

Sir William Joynson-Hicks Says Socialism Not the Policy of the Working Man

Speaking at a meeting of the Primrose League in London, Sir William Joynson-Hicks, the new home secretary, said he did not believe for a moment that there were many Socialists in Great Britain today and expressed the opinion that more than 5,525,000 people had voted thus in the recent general election, had done so because they wanted to vote for candidates of their own class without regard to Socialism.

The Conservative party in the next few years Sir William said, should adopt the words of Lord Beaconsfield, "educate, educate, educate," and get the people to realize that the Socialist party was not really the Labor party, nor the party of the working man. They must get the working men to realize that the Socialist party was quite distinct from the Labor party's interest and the interests of social reform.

## London's Garage De Luxe

Old Reservoir Has Been Made Into Up-to-Date Building

One of London's largest garages is being made in a reservoir on the top of Campden Hill, Kensington, W.

This roofed-in reservoir, covering more than an acre, had been derelict for 20 1/2 years. The place is now a two-story garage with accommodation for about 500 cars.

A third floor is to be added, and the place will then be able to house 1,000 motor cars. There will be 100 lock-up garages, a washing pool through which cars can be driven to clean their under parts, compressed air apparatus for tire inflation, and petrol pumps operated by pressing a button.

## Queen Mary Never Idle

Spends Much Time Looking After Servants' Comfort

Queen Mary is no less busy than her son. There is a saying in Buckingham Palace, "Five shillings for anyone who sees the Queen doing nothing." In this way the household staff express their confidence in her inability to be idle. Much of the Queen's time is spent in the staff quarters, where she superintends all the arrangements made for the comfort of the domestics and inspects nearly every meal of which they partake in order to satisfy herself as to its quality and quantity.

## Selling Goods At Wembley

Big Bargain Sale After All Exhibits Are Dismantled

The greatest bargain sale in the world will take place in December, when the British Empire Exhibition at Wembley closes down. The display, ended November 1, and immediately after that date thousands of workmen took charge and proceeded with their task of dismantling the exhibits.

Even should they decide to re-open the exhibition next year—and that is not improbable—it is estimated there will be between \$10,000,000 and \$15,000,000 worth of goods to be sold.

## Monks At Oxford

Will Celebrate 700th Anniversary Of Arrival of Franciscan Friars

The 700th anniversary of the arrival of the Franciscan Friars in Oxford will be observed by monks at that ancient city. A pontifical high mass will be celebrated at the Church of St. Mary's on the site of the ancient friary. Because of the close connection between the Friars and the University and City of Oxford in medieval days, the Lord Mayor and the Vice-Chancellor will take part in the celebrations.

## Breeding of Mink

The breeding of mink for commercial purposes is a new industry which has followed the success of the silver black fox breeding in Prince Edward Island. This venture has met with considerable success and recently a shipment of mink was made to British Columbia and points in the Western United States.

## Winnipeg May Get Hat Works

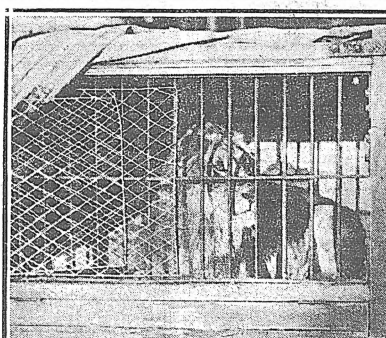

A representative of the Canadian Hat Works, of St. Louis, Mo., has been in Winnipeg recently, looking over the market with a view to establishing a branch of their great hat works in Canada, and Winnipeg may be the choice.

## Appointed to Byng's Staff

The appointment of Captain Charles Stafford Price-Davies, M.C., of the King's Royal Rifle, as an aide to the King's Exchequer Baron Byng of Vimy, is noted in the Canada Gazette.

## Hotel Towel Theft

The manager of a large Montreal hotel stated that approximately 10,000 towels were taken by guests annually, which, placed end to end, would reach five miles.

## From Africa to Toronto via Dublin

A lion and a lioness destined for the Toronto Zoo exhibited no signs of protest as they were placed with their travelling cases of oak and iron aboard a Dominion Express car at the Canadian Pacific Windsor Station, Montreal, recently. The male of the species was born in South Africa about three years ago, while the female first saw the light of day about the same time in the Royal Zoological Gardens, Dublin, Ireland, from whence they have both come, a present to the Toronto Parks Commission. The Toronto Parks Commission will shortly send a pair of deer to Dublin in reciprocation.

## Canada A Desirable Country

Most Attractive Place For British Emigrant Says Gen. Booth

Canada stands out among the dominions as the most attractive to the British emigrant, in the opinion of General Brannell Booth, head of the Salvation Army, who has returned to London on the conclusion of a tour of Canada.

The exchange from the miseries of unemployment or precarious employment in this country to a condition of having enough and some to spare, he said, was indeed a happy one. He confirmed the view, which he expressed some time ago, that of all the parts of the British empire open to emigrants of the Old Land, Canada was the most promising to the newcomer.

The general added that he was quite satisfied with his trip to the dominion and that the Salvation Army was working ahead from coast to coast.

## Making Cream Of Tartar

Deposit of Grapes Furnishes Material For Well-Known Product

Grapes and cream of tartar are seldom bracketed together in the minds of the public, but in reality they are closely associated with each other. During the process of making wine from grapes a certain substance is deposited on the inside of the wooden vats in which the expressed juice is placed for curing. When the process is complete and the liquid is removed, the alcohol or reddish crust are removed and discarded. The final product is the white powder commonly called cream of tartar. The quality varies with the grapes used and the extent to which the apples are purified.

## The Greatest Teacher

Real Education Can Only Be Obtained Through Experience

Most Americans get their schooling between the ages of six and sixteen, says Prof. Dallas L. Sharp, of Boston University. That is true. But most of us do not begin to get our real education until we leave school. Experience remains the greatest teacher. When a school graduate strikes out in the world for himself, one of the first things he has to do is to learn much of what he has been taught. The decision that takes most time to get out of the head is youth's inflated conception of the possibilities of success—Banger Commercial.

## Willing to Oblige

A clergyman chose for his text the following verses: "Which of you will go up with me to Ramoth Gilead?" Then, pausing, he again and again repeated the words. At last a sailor started from his seat, and, looking around with eyes full of indignation, exclaimed:

"Will none of you go with the gentleman? Then, hang it, I'll go myself."

## Brown Favorite Color

Despite desperate efforts on the part of the dressmakers, brown and not green will be the predominant color worn by women this season. The defeat of green may be attributed to the superstition that it is unwholesome. Even the dictators of fashion could not overcome that.

An irascible bridegroom of 63, marrying his third wife, went into the vestry to sign the register. After several fruitless attempts to make a mark on the paper, he turned to the clergyman and said:

"This is the second or third time you've played me this trick! Next time I shall bring my own pen!"

If you haven't any enemies to forgive, pardon a few of your friends.

## Entailed Bedsteads

Many People in England Still Observe Old Custom

One conspicuous cause in Shakespeare's will provides that his widow was to have the second best bedstead in the house, and that cause has been the subject of much discussion, many people wondering why he was content to give her the second best and not for whom the best was held. The London Post makes the explanation, that the best bedstead in the home often is entailed, the possessor having only a life use of it, after which it must pass on to the next in line, and points out that Anne Hathaway's bedstead remains to this day in the house where she used it, having passed with the house to succeeding generations—Ohio State Journal.

## Making Paint From Mummies

Wonderful Rich Brown Color Is Admired By Artists

Mummies, the older the better, are said to make the finest of brown paint. The only trouble is there are not enough mummies. The paint is made by grinding the bones of the mummies with the bitumen with which they were embalmed. Besides its wonderful rich color, the paint has the advantage of being practically permanent, and for these reasons it is in great demand among the artists, especially portrait painters whose subjects have brown hair. Only those of between 2,000 to 5,000 years of age will produce the beautiful brown paint sought by artists. It was during that period that the art of embalming was at its best.

## Small Electric Lamp

Designed For Hospital Work Is Stand-By in Emergencies

The smallest electric lamp in the world is about one-quarter candlepower. It is a quarter of an inch in diameter about the size of a grain of wheat, and was designed for use in hospitals and by doctors. A lamp of this type was recently used by a doctor when he withdrew a tack from the lung of an eight-month-old baby. The bulb is inserted at the end of a silver tube about the size of an ordinary lead pencil, which in this case was inserted down the child's throat, and gave enough light for the doctor to locate the tack.

## When Elephants Go Mad

Fit Soon Passes But Animal Is Usually Shot

Elephants are apt to be seized with sudden madness, in which they do not stop short of murder. The fit passes away, but the culprit is inevitably shot.

Wild elephants often invade villages and mauling time and terrorize the inhabitants. Within late years, Moravia, the capital of the West African negro republic, has suffered from these incursions. When the wild elephants come to town the terrified inhabitants lie low and allow their unwelcome visitors free play.

## Two Races In Belgium

Speak Different Language But Always Stand Together

Belgium is made up of two distinct races, Walloons and Flemish. These people are equally divided, speaking a language as widely different as English is from Spanish. But though mutually and linguistically the Belgians make up a sort of home divided against itself, politically and religiously they constitute as staunch a nationality as does French-German-Flemish-speaking Switzerland, and they have stood together through the centuries under various rulers.

## Model Convict Prison

Institution In Switzerland Has Become Perfectly Self-Supporting

One of the most up-to-date penitentiaries in the world is to be found in Switzerland. The old idea of solitary confinement is eliminated altogether and the institution is practically self-supporting. Within 30 years an uncultivated stretch of marshland and of pasture has been turned into a flourishing farm of 2,500 acres, solely by the work of convicts.

## Model Convict Prison

Institution In Switzerland Has Become Perfectly Self-Supporting

One of the most up-to-date penitentiaries in the world is to be found in Switzerland. The old idea of solitary confinement is eliminated altogether and the institution is practically self-supporting. Within 30 years an uncultivated stretch of marshland and of pasture has been turned into a flourishing farm of 2,500 acres, solely by the work of convicts.

Within 30 years an uncultivated stretch of marshland and of pasture has been turned into a flourishing farm of 2,500 acres, solely by the work of convicts.

## Dairy Industry Flourishes

Northern Saskatchewan Dairy Farmers Do Big Business

William Leeson, of St. Walburg, Sask., is on his way east to purchase nine cowboys, about 240 head of dairy cattle for the dairy farmers of the St. Walburg district.

Most of the animals purchased will be Ayrshires of high quality. Cash will be paid for all the animals.

Five years ago Mr. Leeson was induced by the Canadian National Railways colonization department to establish a creamery in the St. Walburg district, 50 miles north of North Battleford. He now has three creameries with a total output of 600,000 pounds of creamery butter this year, all of which has been sold for export to Great Britain.

## Surplus Of Buffalo

Both Canada and U.S. Have Now Excess of These Animals

It looks as if the buffalo had really ceased to be threatened with extinction. Not long ago the Canadian Government sold its surplus of the animals—to be made into meat. The American Department of the Interior has now announced that the preserve in the Yellowstone National Park is overstocked. A statement in the American press to this effect followed by the intimation that the surplus would be given away has resulted in a flood of applications to Washington. Some of the applicants obviously have but a hazy notion of the kind of beast they desire to own. Several children have applied for "little ones as pets."

A Colorado man ordered two truck loads, and another, in Iowa, wrote saying: "I would like to have one of those buffaloes that you are giving away. What and how old ones do you send?" A man in Georgia wanted one to give to his daughter as a birthday present, and another applicant desired a couple of buffaloes, "gentle enough to hitch in the front yard."—Manchester Guardian.

## Old Clock Found Embedded In Coal

Coalstown Man Refuses \$250 For Ancient Timepiece

It. R. Leeson, Coalstown, Ont., about a month ago, ordered some coal as part of his winter stock, and in searching back for it he chanced to find a lump of soft coal which had embedded in it. Gathering it up, the purchaser was about to throw it into the grate to start a fire, when a eardrum protruding from the lump caught his attention. Loosening the lump, he found a wooden clock which had been firmly embedded in the coal.

The clock stands about 14 inches high, and the face is made of cherry wood, and the rear framework of quarter oak. The face, which is carved, bears the inscription, "Columbus, Anno 1492."

It is considered to be an excellent imitation of a Dutch model dating back to 1670, and Mr. Leeson has refused \$250 for it.

## Prince Kept Himself Informed

Received Two Cables Daily While On His Holiday

The Prince of Wales, wherever he may happen to be, makes a point of knowing all that there is to know about what is happening at home. While on his holiday in the Canary Islands, he received two cables daily, and knew all about the election before breakfast on the morning following the defeat of the government. His Royal Highness confessed to having been affected by what he termed "that American feeling."

Although he has always been so used to examining two days' work into one, it took him a few days to get used to the bewildering rapidity with which one fixture followed another.

## Canadian Wheat Yield

According to a detailed statement of the Canadian wheat yield last year appearing in the Winnipeg Free Press, the total production of marketable wheat in the prairie provinces amounted to 12,023,915 bushels.

Of this amount Alberta produced 124,455,350 bushels; Saskatchewan, 270,600,510; and Manitoba, 26,878,053.

## Would Train Young Farmers

Providing that some way could be found towards financing the cost of transportation, the Canadian Army was prepared to establish schools in Canada where mixed farming would be taught the young generation of immigrants from the British Isles, General Brannell Booth, head of the army, stated at Winnipeg.

## Doing Well

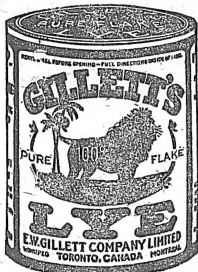

"Say, that's odd, a good-looking car you have there. What's the most you ever got out of it?"

"Six times in one mile."

## Doing Well

No person is so punctual when it comes to keeping appointments as the bill collector.

## WORLD HAPPENINGS BRIEFLY TOLD

Sir Archibald Geikie, former president of the Royal Society and the Geological Society of London, is dead.

Switzerland's allotment for the reconstruction loan to Germany under the Dawes reparations plan, has been over-subscribed \$108,000, according to a Central News dispatch.

Charles W. Lightholme, of Yorkton, Sask., is the Saskatchewan Rhodes scholar for 1935. He was selected by the Rhodes scholarship committee from among six applicants.

The number of divorces in the United States last year was 11 per cent. more than in 1922, while the number of marriages was only 8.4 per cent. larger than the previous year.

Madame A. Kolantary, is the first woman in the world to be appointed as a minister plenipotentiary. She has arrived in Constantinople as the ambassador from Russia to Norway.

It cost the United States slightly more than ten cents a meal for its soldiers during the fiscal year ended last June 30, according to the annual report of the quartermaster-general.

Americans are eating more butter. The department of agriculture announces that 50,000,000 pounds more were consumed in the first nine months of this year than in the same period last year.

Fallures in Canada during the week ended Nov. 7, totalled 35, as compared with fifty for the corresponding week of 1923, according to Dun's Bulletin. Manitoba reported four, Saskatchewan three and British Columbia one.

## Sore, Aching Corns Drop Out In Hot Bath

To take the sting out of corns and to be sure you are to be rid of them quickly, the hot foot bath employed with Putnam's Painless Corn Extractor is best of all. To use "Putnam's" is to end corns quickly. The aching disappears, toes feel better at once—another application or two and the corns go away. Satisfaction is assured to everyone who uses Putnam's Painless Corn Extractor, 25 cents at all dealers.

## PUTNAM'S Corn Extractor

**Establish Swiss Settlers**  
A society for promoting successful establishment of Swiss immigrants in Canada has been incorporated, according to official announcement in the Canada Gazette. The society aims to establish Swiss settlers in most congenial possible surroundings, and to "make practical studies and investigations of the various problems involved in settlement, and to distribute useful information to Swiss prospective and established settlers in Canada."

**Elevator Co. Extends Operation**  
Provincial incorporation of the Saskatchewan Co-operative Elevator Company, Ltd., of Regina and Vancouver, with a capital of \$5,000,000, is announced in the British Columbia Gazette.

## TROUBLED WITH ECZEMA ON FACE

Very Itchy. Caused Eruptions. Could Not Sleep. Cuticura Healed.

"I was troubled with eczema on my face. It broke out in a rash on my chin and was very itchy. Scratching caused eruptions and in a few weeks it spread all over my face. I could not sleep, and when I washed my face I would almost have to scream."

"I read an advertisement for Cuticura Soap and Ointment and ordered a free sample. I purchased more, and after using two cakes of Soap and one box of Ointment I was healed." (Signed) Miss Kathleen Rothenbush, Box 49, Duff, Sask.

Use Cuticura Soap, Ointment and Talcum dust and keep your skin clean and healthy.

## Making Moscow Modern

Special Commission Seeking Foreign Loans to Help  
Moscow will soon rival in beauty and civic modernity any European capital, if present plans of the municipal authorities materialize. Preparations are being made for the construction of a subway and the establishment of omnibus systems, trolley lines, new tramways and other improvements. The present sewage and canal system will be entirely remodelled. A special commission representing the Moscow Soviet has left for Germany, France and Great Britain to seek foreign loans for these projects.

## WHY RHEUMATISM OFTEN COMES BACK

The Usual Treatment Does Not Reach the Root of the Trouble

Most treatments for rheumatism do more than to keep down the poison in the blood, but do not reach to overcome that particular attack. When the system becomes run-down from any cause the disease again gets the upper hand and it all has to be done over.

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. This treatment, with this medicine has proved in thousands of cases that it builds up from any cause the disease again gets the upper hand and it all has to be done over.

## May Regain Control of Colony

Germans Have Choice to Buy Back Part of Lost Colony in Africa

The Germans have a chance to buy back a considerable area of their lost colony of Kamerun in Western Africa, according to the London Daily Mail, which says that 50,000 acres of valuable plantations there are to be auctioned in London by order of the late government, it being stipulated that there shall be no restriction regarding the nationality of the purchasers.

General Disfranchisement of the arrival of an unofficial representative of the German Government to urge the permanent mandate commission of the League of Nations to arrange for the convocation of a colonial conference for consideration of the question of restoring to Germany some of the former German territory now under mandate.

Kamerun, which was divided between the British and French after the war, is administered under a mandate which contains provisions directed against slavery, forced labor and abuse of the traffic in arms and spirituous liquors.

## Australian Discovery Valuable To Surgery

Biggest Contribution To Surgical Science Says Dr. Mayo

In the opinion of Dr. Charles Mayo, the outstanding contribution to surgery that has been brought to the attention of the surgical congress comes from three Australians. "It involves an operation on certain sympathetic nerves and thus opens to surgery a new field of exploration," he announced. "It is a sort of North Polar excursion in surgery. I would characterize their work as nothing short of great."

The Australian doctors are Dr. N. D. Royle, Dr. John I. Hunter and Dr. H. B. Devine. All three were with the Australian troops during the war. Their experiments were the outgrowth of treatment of various forms of paralysis caused by bullets.

## SUNDAY SCHOOL LESSON

NOVEMBER 18

THE TRANSFIGURATION

Golden Text: This is my Son, my chosen; hear ye him. Luke 9:35.

Lesson: Luke 9:28-35.

Devotional Reading: Psalm 56:1-7.

The Text Explained and Illumined

The Transfiguration, verses 28-31.

The time of this event is given by all three Evangelists; it was about a week after six days, say Mark and Matthew; about eight days after, says Luke.

After "these sayings"—Peter's acknowledgment at Caesarea Philippi that Jesus is the Christ, the Son of the Living God, and Jesus's announcement of His coming crucifixion, "The Son of man shall suffer many things," Jesus said: "He rejected of the elders and the chief priests and the scribes, and he killed and after three days raised again." This Peter had not been able to accept: "Far be it from thee, Lord; this shall never be unto thee," he had cried. Jesus had energetically repelled the suggestion: "Get thee behind me, Satan," he exclaimed; "thou art a stumbling block to me, for thou mindest not the things of God, but the things of men." The week that followed must have been no ordinary week in the training of the Twelve, for they were far from the crowds that followed Jesus in the homeland, and widely free from interruption. Dr. A. B. Bruce reminds us that the Gospel historians are not wont to be so careful in their indication of time, and their minute accuracy here signifies in effect: "While the foregoing communications and discourses concerning the cross were fresh in the thought of all, the wondrous events we are now to relate took place." The date, in fact, is "a fingerpost pointing back to the conversation on the passion, and saying, 'If you desire to understand what follows, remember what went before!'"

Sweden Will Stay Dry

One of the results of the recent Norwegian elections in which the Conservative and Agrarian (Peasant) parties secured a narrow combined majority of two seats in the Storting, will be the retention of prohibition which was opposed by the Conservatives, but favored by a majority of Agrarian nominees.

A Splendid Investment

The St. Thomas Times-Journal says that prohibition is better than any and advocates state endowment of scientists to discover the cause and prevention of disease. Agreed. A commencement has been made with Dr. Banting. Why not others? It would be a splendid investment.—Kingston Standard.

# CANADIAN NATIONAL RAILWAYS EXCURSIONS

## EASTERN CENTRAL PACIFIC CANADA STATES COAST

December 1st to January 5th, 1925

December 1st to January 5th, 1925

Certain dates Dec., Jan., Feb.

Full information on these special fares will be gladly given. We will also be pleased to assist in planning your trip and arrange all details.

#### CHRISTMAS CONCERT

The staff of the Chinook Consolidated School are unanimous in giving public expression to the statements which follow:

First,—the standing of the classes throughout the school, particularly in mathematics, is below the standard.

Second,—the primary object of the school is academic education such as will prepare for business activities.

Third,—social features which may be more or less educational should take at least second place to the primary purpose of the school.

Fourth,—each individual member of the staff is bending every effort to raise the status of grades to a satisfactory standard.

Fifth,—in order to reach a satisfactory standard time is not afforded for unnecessary activities.

Sixth,—preparatory training for a Christmas concert makes too serious demands: (a) on the time out of school hours which the teachers are accustomed to use for preparing lessons and examining work, (b) on regular time devoted to instruction in the school.

Seventh,—the staff would be pleased to shoulder the whole responsibility for a Christmas concert under normal conditions; but considering the present status of the grades are afraid to take so much time from both necessary preparation and necessary class periods.

It is with considerable regret that the staff came to this conclusion even after arranging a program. The Christmas concert is a community feature and the teachers have no wish to be delinquent toward the community, but things of first importance must receive first attention.

#### Public And High School Report For October

The following is the report of the Chinook public and high school for the month of October:

Grade IX—5 Tests  
Douglas Smith, 64.4; Audrey Neff, 58.2; Ethel Young, 48.8; Marvel Milligan, 47.

Grade X—4 Tests  
Ben Fergusson, 66.3; David Smith, 64.8; May Todd, 55.3; Albert Gingles, 52.3; Agnes Gingles, 51.6; Caro Dumanowski, 51; Orford Blaine, 47.

Grade XI—5 Tests  
Mabel Langford, 65; Mildred Denton, 64.5; Crystal Aarsby, 61.6; Margaret Bayley, 54.6; Margaret Young, 51.6; Raymond Deman, 50.6; Orville Horgen, 40.

Grade V. Average percentage Rank  
Blanche Shabino 81 1  
Gladys Wright 75 2  
Elsie Smith 72 3  
Ursula Adams 68.5 4  
Charles Short 68 5  
August Vanderberg 67 6  
Muriel Smith 63 7  
Wilfred Beicester 53 8  
Robert Featherstone 53 8  
unranked

Grade IV  
Marjorie Lee 82 1  
Urdine Brownell 80 2  
Norma Hurley 74 3  
Celestine Dressel 73 4  
John Howton 71 5  
Jean MacIntosh 68.1 6  
James Cliphsham 68 7  
Nora McLaughlin 65 8  
Margaret McLean 62 9  
Vera Cliphsham 61 10

Unranked—Harry Varcoe, Martin Aarsby, Louis Hohlen and Norman O'Malley.  
Grade III  
Mildred Cliphsham 82 1  
Louise Vanderberg 76 2  
Betty Milligan 76 3  
Gwendoline Short 74 4  
Iona Rennie 67 5  
Leslie Smith 64 6  
Grace O'Malley 64 6  
Unranked—Margaret McKenzie and Kenneth Dawson.

#### Edmonton Bye-election

The official returns on the bye-election in Edmonton city to fill the seat in the Provincial Legislature vacated by H. H. Mr Justice Boyle, were made the past week, and show W. T. Henry, Liberal, to be elected over A. F. Ewing, Conservative, by 27 majority. On the transferable ballot G. V. Pelton, Independent Liberal, was eliminated on the second count, and H. M. Bartholomew, Labour, eliminated on the third count.

The cost of the bye-election was placed at \$9,105, as compared with \$9,686 in the liquor plebiscite of a year ago, and with \$18,130 in the Edmonton riding in the general election of 1921.

Details of special train service, via Canadian National Railways, to the ship's side, Halifax, for Old Country Christmas sailings, are announced elsewhere in this issue. There will be a big demand for these Christmas sailings and those contemplating a trip to the Old Country should book now with the local agent of the Canadian National Railways, who represents all steamship lines and who will be pleased to make complete arrangements for your trip.

#### RAW FURS

Now is the time to realize on your early caught pelts. I purchase all kinds of raw furs, anytime (except Sunday). Bring me yours now. I will pay you cash for them according to quality.

Manager of Imperial Lumber Yards,  
Chinook, Alta.

O. Hinds shipped a car load of sheep to Calgary this week. He expects to ship cattle next week.

#### Farmers' Union Organize At Chinook

There was a fair attendance of farmers at a meeting held in the Chinook School last Friday in the interests of the Farmers' Union of Canada.

Mr. McNamee, President of the Union, spoke at some length, giving a detailed outline of the starting of this Union and what it had already accomplished in its short history.

During his remarks the speaker showed how instrumental the Union was in bringing Sapiro to Canada. He asked whether the Union, when it had only 700 members, justified its existence when it was the means of establishing a wheat pool between Winnipeg and the Mountains?

Mr. McNamee explained why the Union did not go into politics. He also said the Union did not curtail the personal liberties of the individual member. It was simply an organization to help the farmer to get economic justice.

The Union does not believe in co-operative buying for the reason that if the farmer could get the full value for his product he would have no need to interfere with the small retail merchant. The country merchant is a friend of the farmer, and if the farmer did not succeed the merchant could not. The speaker said that the small country merchant had just as hard a time as the farmer and without the country store we could not enjoy the social centres which have been created by the small merchant on the prairies.

During the evening, Mr. McNamee said the Union now had a membership of 30,000, and was growing rapidly. After the meeting a number of farmers met and organized a local lodge.
